Equipment Required: If you are already connected to the Opticomm access network (FTTP) then you will require a Home Router to connect to our internet service. If you are already connected to the Opticomm access network (FTTB) then you will require a Home Modem and Home Router to connect to our internet service. On sign up you are able to purchase the required home equipment from us. If your premises is not connected to the Opticomm access network then you will require Opticomm supplied equipment to be installed at your premises (charges apply).

Internet Speeds: There are a lot of different variables that may affect your internet speeds. Due to there being so many different variables we are only comfortable saying that your evening download/upload speeds may vary.

Phones: We do not sell any voice or VoIP services. If you have a landline phone then we advise that you port your landline number over to a VoIP provider. We strongly advise that your landline phone is tested and confirmed working on your VoIP provider before moving your internet connection to us. VoIP will function over our Opticomm internet service.

Alarms: If you have any medical alarms, security alarms, etc then the responsibility is on you as the customer to make sure these devices will function once you have your internet service with us.

Fax: We do not sell any fax services. If you have a fax line then we advise that you port your fax line over to a FoIP provider.

Priority Assistance: We do not offer priority assistance.
