4K Video Streaming	No	Yes	Yes	Yes	Yes	Yes
Online Gaming	Yes	Yes	Yes	Yes	Yes	Yes

Important things to know

*Typical evening speed measures network speed to customer premises, it is not a measure of customers' received in-premises speed. Tier speeds are the maximum possible download speeds available during off-peak periods. The amount of simultaneous users is based on being able to provide HD 720p video to each user/device.

Technical limitations

- Opticomm service will not work during power failures. This service does not include a battery backup power supply for either Opticomm's equipment or any customer equipment. This also means you will not be able to make calls on a VoIP phone during a power outage, including calls to emergency services.
- Your speed or performance may be reduced by a range of variables such as Home Computer, Home Wifi, Home Cabling, Home Modem/Router, and much more. We are experts in troubleshooting speed, performance, and dropout issues and will work with you to get them resolved.

Medical alarms/security

- Before changing your internet, you should find out if any medical/security alarm services you want to use are compatible with an Opticomm service.
